

## Machine Guards

### Applications

Bespoke automated production equipment such as food processing & packaging lines often require safety guarding.

Clear vision guarding enables operators to constantly monitor machine performance, and ensure all required cleanliness levels are maintained.

Panel Graphic have invested in the latest technology to provide our customers with high quality transparent guarding, and have been supplying manufacturers of automation systems with protection panels for many years.

### Materials

The materials we use offer several advantages and can possess additional benefits such as:

- High impact strength
- Exceptional fire ratings
- Machine polished edges
- Surface Hard Coating
- Food safe materials

### Precision

Whether it's a single machine guard or high volume production, parts can be supplied with safe and smooth high quality CNC precision cut finishes, ensuring that functionality and safety is of utmost importance at all times.
